

PRESS RELEASE

To coincide with this years launch of their product SUNBURST™, UK Nutrition Limited, one of the countries leading manufacturers & distributors, of crop nutrients, has launched its new web site.

Speaking at the launch, director Frank Worsencroft said “With the premium for milling quality wheat, being somewhere around £28 to £30 per tonne, and prices being encouragingly high for wheat, it was a happy coincident that we launched the web site at the time as launching Sunburst™”.

Sunburst™ is a foliar applied stabilized ureic nitrogen product, which applied at 50 litres per hectare, assists in achieving the milling wheat protein content, and the milling wheat premium.

Full details can be found on the companies web site
